

Indoor Tanning Equipment

Care and Use Instructions

**Montego Bay Classic
Wolff 2600B & 3200B**

Bellarium - S

Montego Bay
1040 Wilt Ave.
Ridgefield, NJ 07657

1-800-FAST TAN

**100142
REV. 1**

This product is in conformance with performance standards for sunlamp products under 21 CFR PART 1040.20.

Instructions accompanying this product should always be followed to avoid or minimize potential injury.

USE PROTECTIVE EYEWEAR WHENEVER THE EQUIPMENT IS ENERGIZED. READ THE INSTRUCTIONS BEFORE USING THIS PRODUCT.

Tanning can begin on a regular basis (allowing 48 hours between sessions). An appearance of tanning normally occurs after a few exposures and maximizes after four (4) weeks of exposure following the maximum of two (2) weekly twenty minute sessions is recommended from the fifth week onward.

SKIN TYPE	WEEK 1	WEEK 2	WEEK 3	WEEK 4	WEEK 5 &
V - FAIR	3 MIN.	6 MIN.	12 MIN.	15 MIN.	20 MIN.
II - AVERAGE	4 MIN.	8 MIN.	12 MIN.	15 MIN.	20 MIN.
III - BROWN	5 MIN.	10 MIN.	12 MIN.	15 MIN.	20 MIN.
V - DARK BROWN	6 MIN.	12 MIN.	15 MIN.	15 MIN.	20 MIN.

RECOMMENDED EXPOSURE SCHEDULE

To obtain recommended exposure at a minimum distance of 1/2" (13 mm) measured with a standard ruler, lie on acrylic surface of lounger and lower canopy. Canopy will stop at 12 inches (305 mm) from lounger acrylic surface. The use of any other position may result in overexposure

This unit utilizes UVA lamps. Replace with **BELLARIUM S SA1-10 100W** lamps, or FDA approved equivalent. Medication or cosmetics may increase your sensitivity to the ultraviolet radiation. Consult physician before using sunlamp. If you are using medications or have a history of skin problems or believe yourself especially sensitive to sunlight. If you do not tan in the sun, you are unlikely to tan from use of this product.

DANGER - ULTRAVIOLET RADIATION Follow instructions. Avoid overexposure. As with natural sunlight, overexposure can cause eye and skin injury and allergic reactions. Repeated exposure may cause permanent aging of the skin and skin cancer. **WEAR PROTECTIVE EYE WEAR; FAILURE TO DO SO MAY RESULT IN SEVERE BURNS OR LONG-TERM INJURY TO THE EYES.**

MODEL	LENGTH	WIDTH	HEIGHT (Closed)	HEIGHT (Open)	NUMBER OF LAMPS	VOLTAGE	AMPEREAGE	SHIPPING WEIGHT

UNIT SPECIFICATIONS

WARNING:

If you have been diagnosed by a physician as being allergic to the sun or are currently taking photosensitive medications, consult your physician before using the sunlamp.

Certain drugs – particularly those designed to enhance photosensitivity – may cause individuals under their influence to experience adverse effects, and those people should avoid exposure to UV sources of all kinds. Doctors will advise persons taking these drugs of possible adverse effects.

It is recommended that only one person at a time use the tanning system. Use protective eyewear while taking a tanning session. Protective eyewear is provided with each sunlamp sold.

Occasionally, persons using the tanning system will experience a slight reddening of the skin – usually in small patches – after the second or third session. This redness is often accompanied by an itching sensation. This is nothing more than a heat "rash" caused by heat from the lamps within the system. It is generally very limited and caused by constant contact of the skin with the acrylic surface. It will go away within approximately 24 hours and should not reappear. This rash can be lessened or prevented by turning over occasionally during sessions in the sunlamp, and by applying moisturizing lotion to the affected area after the tanning session is completed.

CAUTION

WHILE THERE IS NO IMMEDIATE CLINICAL EVIDENCE REGARDING UVA EXPOSURE AND ITS EFFECTS UPON EXPECTANT MOTHERS, IT IS STRONGLY ADVISED THAT EXPECTANT MOTHERS BE DISCOURAGED FROM USING THE SUNLAMP.

EXPOSURE TIMES AND FREQUENCIES

Melanin, the brownish pigment produced by special cells in the base layer of the skin determines the individuals ability to tan. As the skin is exposed to ultraviolet rays, the melanin is activated and combines with protein cells that rise to the skin's surface, thus producing a tan. The amount of melanin in your body determines how quickly and darkly you tan.

NOTE

THE TAN PRODUCED BY THE SUNLAMP IS A DEEP, RICH "COSMETIC" TAN. HOWEVER, REGARDLESS OF HOW MUCH AN INDIVIDUAL MAY TAN WITH THIS UNIT, IT WILL NOT PROVIDE ADEQUATE PROTECTION AGAINST OVEREXPOSURE TO NATURAL SUNLIGHT OR UVB TANNING SYSTEMS.

- | | |
|----------------|---|
| SKIN TYPE II- | THIS IS THE INDIVIDUAL THAT USUALLY BURNS EASILY AND SEVERELY, TANS MINIMALLY OR LIGHTLY AND PEELS. |
| SKIN TYPE III- | OFTEN REFERRED TO AS "AVERAGE" COMPLEXION, BURNS MODERATELY AND TANS ABOUT AVERAGE. |
| SKIN TYPE IV- | THIS INDIVIDUAL BURNS MINIMALLY, TANS EASILY AND ABOVE AVERAGE WITH EACH EXPOSURE. |
| SKIN TYPE V- | THIS INDIVIDUAL RARELY BURNS, TANS EASILY. |

After the timer is set (and the "on-off" switch is "on"), the unit is ready for immediate operation. Lie on acrylic surface of lounge and lower canopy. The canopy will stop with its acrylic surface 12 inches (305 mm) from the acrylic surface of the lounge. There is no additional time required for lamp start-up.

To operate timer, rotate knob clockwise to the desired tanning time, timer can be set to a maximum of twenty (20) minutes. Refer to the exposure times and frequencies for correct timer setting.

This unit is equipped with a remote timer. The timer is used to preselect the actual tanning time and switch on the sunlamp. The timer will automatically switch the sunlamp off when the preselected time expires.

OPERATING YOUR SUNLAMP

COMPLY WITH RECOMMENDATIONS AND WARNINGS STATED ABOVE MAY VOID THE MANUFACTURER'S WARRANTY.
LAURATE AND ARE DESIGNED FOR USE WITH INDOOR TANNING EQUIPMENT. FAILURE TO DO NOT CONTAIN POLYETHYLENE/GLYCOL LAURATE OR POLYETHYLENE/GLYCOL MONO INDUCING A TAN. IT IS RECOMMENDED THAT YOU USE ONLY CREAMS, OILS OR LOTIONS THAT A PHYSICAL BARRIER ON THE SKIN THAT PREVENTS THE UVA RAYS FROM PENETRATING AND COMMERCIALLY AVAILABLE CREAMS, LOTIONS AND OILS CONTAIN SUNSCREENS WHICH FORM

WARNING

SINCE YOUR SUNLAMP WILL CAST OFF SOME HEAT, IT IS RECOMMENDED THAT A SMALL FAN BE USED TO IMPROVE AIR CIRCULATION DURING SESSIONS. LIKEWISE, ADEQUATE VENTILATION OF THE ROOM OR BOOTH HOUSING THE SUNLAMP IS REQUIRED FOR COMFORTABLE OPERATION.

SINCE THE BACK AND STOMACH AREAS OF THE BODY WILL RECEIVE THE MAJORITY OF THE TANNING RAYS, IT IS RECOMMENDED THAT INDIVIDUALS SPEND ONE HALF OF EACH SESSION LYING ON EACH SIDE OF THE BODY TO ACHIEVE A FULL-BODIED TAN.

NOTE

NO TWO INDIVIDUAL SKIN TONES ARE THE SAME. A TAN TO ONE PERSON MAY BE DIFFERENT TO ANOTHER, AND SESSION LENGTH MAY VARY. IT IS RECOMMENDED THAT, FOLLOWING A TANNING SESSION, A SKIN MOISTURIZER BE APPLIED. THIS PROMOTES A SMOOTHER MORE EVEN LOOKING TAN. EQUALLY IMPORTANT - MANY FACIAL MAKE-UPS HAVE OIL BASES AND SHOULD BE REMOVED PRIOR TO EACH TANNING SESSION.

SKIN TYPE	WEEK 1	WEEK 2	WEEK 3	WEEK 4	WEEK 5 &
	1st-3rd Session	4th-6th Session	7th-10th Session	11th-15th Session	Subsequent Sessions
II - FAIR	3 MIN.	6 MIN.	12 MIN.	15 MIN.	20 MIN.
III - AVERAGE	4 MIN.	8 MIN.	12 MIN.	15 MIN.	20 MIN.
IV - BROWN	5 MIN.	10 MIN.	15 MIN.	20 MIN.	20 MIN.
V - DARK BROWN	6 MIN.	12 MIN.	15 MIN.	20 MIN.	20 MIN.

RECOMMENDED EXPOSURE SCHEDULE

CARE AND CLEANING OF YOUR SUNLAMP

CAUTION: THE SUNLAMP SHOULD BE DISCONNECTED FROM THE POWER SUPPLY BEFORE CLEANING OR DISINFECTING THE INSIDE OF THE ACRYLIC. AVOID WATER OR SOLUTION ENTERING THE LAMP COMPARTMENT.

After each session is completed, spray the acrylic surface with a specially formulated UVT (ultraviolet transmitting) acrylic cleaner. Wipe the surface of the acrylic with a clean cloth. The acrylic should never be wiped with a dry cloth because this will generate a slight static charge which will attract dust.

For maximum efficiency of your sunlamp, periodic cleaning of lamps, reflectors, acrylics, fans, and the inside of the unit is required.

CAUTION: FAILURE TO CLEAN BEDS, FANS, AND THE INSIDE OF YOUR SUNLAMP COULD VOID THE WARRANTY.

CAUTION: DO NOT USE EXCESSIVE AMOUNTS OF WATER, ANY ABRASIVE CLEANERS, OR ANY SPRAY CLEANER THAT IS NOT SPECIFICALLY DESIGNED FOR USE WITH ACRYLIC SURFACES. DO NOT USE ALCOHOL.

Note: Periodic polishing of the exterior painted surface may be necessary to maintain the finish. An automotive polish, **not wax**, should be used. Do not clean with anything that may damage the paint.

To obtain repairs and recommended replacement components which are compatible with this unit, including UVT acrylic cleaner, protective eyewear, lamps, acrylic, timers, reflectors, and other parts, which will, if installed and used as instructed, result in continued compliance with 21 CFR 1040.20, please contact the Manufacturer:

1-800-FAST TAN

RELAMPING INSTRUCTIONS

CAUTION: REPLACE ONLY WITH BELLARIUM S, SA1-10-100W LAMPS, OR FDA APPROVED EQUIVALENT.

1. Disconnect unit from power source.
2. Remove acrylic from unit by removing the acrylic retaining strip located along one long edge of the acrylic and sliding the acrylic out.
3. Push lamp toward the spring loaded lampholder to disengage the lamp from the stationary lampholder. Remove lamp.
4. Replace by inserting end of lamp in spring loaded lampholder at the end of the unit and push until the lamp will insert and properly seat in stationary lampholder at the other end of the unit.
5. Clean and replace acrylic shield. (Refer: CARE AND CLEANING). Reconnect unit to power.

a. Place a leg slide piece on a flat surface and attach an end piece to each end using (4) $1/4\text{-}20 \times 3/4$ " machine screws and $1/4\text{-}20$ keps nuts. (Note: Also use screw dap washer and plastic caps on outer-away from skirt side only.)

b. Flip assembly over and attach other leg slide piece using (4) more $1/4\text{-}20 \times 3/4$ " machine screws and $1/4\text{-}20$ keps nuts.

c. Repeat steps a and b for second leg.

d. Leg Assembly

1. Open cartons, remove packing, remove and inspect unit and all associated parts and hardware per the hardware drawings in the back of this manual.

3. Leg Installation (See Figure #1)

a. Turn lounge half of unit upside down and position legs over mounting holes in bottom panel.

b. Attach legs using (4) $5/16\text{-}18 \times 1$ " bolts, flat washers and lockwashers each. Tighten all bolts thoroughly.

c. Turn lounge right side up and rest on legs.

d. Hinge Installation

a. Attach hinge assemblies (with brake shoes installed) to each end of lounge using (2) $3/8\text{-}16 \times 2 1/4$ " bolts, (2) bolt cap washers and (2) space washers each. Be sure that the side of hinge assembly with large (1.7/8" dia.) hole at top, is on the inside – toward the bed. Do not tighten bolts completely until bolt caps at this time.

b. Attach pneumatic cylinder clevis to tab on each hinge assembly using $5/16\text{-}18 \times 1$ " bolts and elastic stop nuts. Remove wire locking clips from ball sockets at top of pneumatic cylinders.

c. Lift canopy half of unit (with brake shoes attached) and slide bosses into slots in hinge assemblies (top ends of hinge assemblies must be forced outward in order to accomplish this). Insert (1) $3/8\text{-}16 \times 2 1/4$ " bolt, Teflon washer, and $3/8$ flat washer in each end to hold position. With an assistant holding front edge of canopy at full open position, snap ball sockets on the pneumatic cylinders onto ball studs on canopy.

d. Tighten all bolts thoroughly and snap (3) plastic bolt caps into place over bolt heads on each end of unit. Then, adjust brakes (using 5/32 allen wrench in hardware kit) to provide desired ease of operation.

NOTE: Periodic bolt adjustments are required to ensure all bolts remain securely tightened.

GENERAL TROUBLE SHOOTING GUIDE

The following trouble shooting information is divided into two sections. Section A contains items which the owner may check without the aid of a service person. Section B contains items which must be performed by **qualified service personnel** only. If you have any questions other than the ones listed in your troubleshooting guide, contact your distributor.

(NOTE: All units are not the same, therefore some of the causes may not apply to your unit.)

GENERAL TROUBLESHOOTING (SECTION A)

CAUSE

SOLUTION:

- | | |
|---|---|
| 1. Sunlamp does not operate. | |
| a. No power to the unit. | Check circuit breaker servicing unit. |
| b. Timer not connected to lounge. | Connect cord from timer to timer receptacle on lounge. |
| c. Timer not turned on. | Rotate time knob clockwise to activate unit. |
| d. Canopy not connected to lounge | Connect jumper cord from canopy to lounge. |
| e. "On-off" switch turned off. | Push switch to "on" position. |
| 2. Lamps will not light. | |
| a. Lamp(s) not properly seated in lampholder(s). | Remove lamp(s), inspect contacts on lamp(s), and lampholder(s), reinstall securely into lampholder(s). Replace. |
| 3. Canopy does not hold its position when set. | |
| a. Loose brakes. | Tighten brakes with allen wrench. |
| b. Faulty cylinders. | Replace. |
| 4. Unit is running hot. | |
| a. Tanning room too small or improperly ventilated. | Provide sufficient space and ventilation for system. |
| b. Vent fans dirty. | Clean fan guards to insure air flow is not blocked. |
| 5. Sunlamp is not tanning. | |
| a. Acrylic is dirty. | Clean both sides of acrylic with U.V.T. (Ultraviolet Transmitting) Acrylic Cleaner. |
| b. Lamps and Reflectors are dirty. | Remove lamps, wipe with damp cloth, dry. Wipe reflectors using a soft cloth and U.V.T. Cleaner. |
| c. Lamps are nearing the end of their effective life. | Replace with new lamps. |

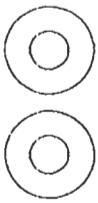

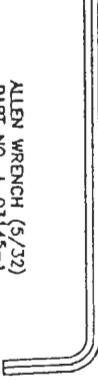

Cause	Solution:
1. Sunlamp does not operate.	a. Incorrect connections of incoming power. Check electrical connections against wiring diagram and correct as necessary.
2. Lamp(s) will not light.	e. Power between lounge and canopy not wired correctly. Check jumper cord connections against wiring diagram and correct as required.
3. Sunlamp running hot.	c. Incorrect incoming power. Check incoming voltage and correct as required.
4. Sunlamp is not tanning.	b. Vent fan(s) not functioning properly. Check wiring to fans and correct as required.
5. Sunlamp will not shut off.	a. Incorrect incoming power. Also see CARE AND CLEANING section.
b. Faulty timer.	Replace. (Note: return defective timer to your distributor).
a. Faulty contactor.	Replace. (Note: return defective contactor to your distributor).
b. Faulty ballast.	Replace incoming voltage and correct as required.
a. Incorrect incoming power.	Check incoming voltage and correct as required.
b. Vent fan(s) not functioning properly.	Replace vent fan(s) if necessary.
a. Incorrect incoming power.	Check wiring to fans and correct as required.
b. Faulty or damaged lampholder(s).	Replace.
a. Poor wire connection at lampholder(s).	Check for loose wire(s) and repair.
b. Faulty or damaged lampholder(s).	Replace.
c. Incorrect incoming power.	Check incoming voltage and correct as required.
d. Ballast(s) not functioning properly.	Locate loose wire (to or from) ballast(s) and correct as required. Replace ballast(s) if necessary.
e. Power between lounge and canopy not wired correctly.	Locate loose wire (to or from) ballast(s) and correct as required. Replace ballast(s) if necessary.
f. Sunlamp running hot.	Check incoming voltage and correct as required.
g. Sunlamp will not shut off.	Replace. (Note: return defective sunlamp to your distributor).

GENERAL TROUBLE SHOOTING GUIDE (SECTION B)

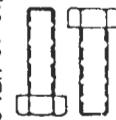

All services in the following sections are to be completed by a qualified service technician. This section is to aid in isolating and correcting any problems which may occur and is not intended for use by owner. Refer to the assembly instructions included with each bed for guidance in assembling and wiring the sunlamp. Disconnect all power to the bed before servicing. Use only factory authorized components for replacement parts.
